EDUCATION

Humber Polytechnic *Etobicoke, ON*
Advanced Diploma: Game Programming Sep 2023 - Present
Expected graduation date: April 2026
Relevant Courses: Data Structures, Computer Networking

Work Experience

Security Systems Technician Intern May 2025 - September 2025
Team Childcare Center Richmond Hill, ON

- Engineered a facility-wide surveillance network by deploying high-definition IP cameras and centralized recording hardware to provide 24/7 site monitoring and safety oversight.
- Implemented a secure access control system utilizing encrypted fob readers and magnetic locks which restricted unauthorized entry and digitized staff attendance logs.
- Provisioned network infrastructure for security hardware by configuring dedicated subnets and routing to ensure high-bandwidth video streaming without impacting administrative operations.
- Validated system integrity through comprehensive failover testing and power-redundancy checks resulting in a 100% reliable security environment for children and staff.

PC Builder & Parts Advisor June 2022 - Present
Contractor Vaughan, ON

- Architected high-performance hardware configurations by analyzing client budgets and technical requirements to deliver optimized, custom-built systems.
- Executed precision hardware assembly utilizing advanced cable management and thermal optimization techniques to maximize system longevity and peak performance.
- Managed full-cycle system deployment by installing operating systems and critical drivers to guarantee 100% functional delivery.
- Resolved complex hardware and software failures via systematic technical troubleshooting resulting in minimized client downtime and improved system reliability.

Technical Projects

Possession Protocol (Unreal Engine 5)

- Engineered complex real-time synchronization logic utilizing Unreal C++ and Blueprint scripting to manage high-frequency data flow and state consistency in a local multiplayer environment.
- Architected automated agent behaviors by designing and implementing custom Behavior Trees which optimized CPU cycles and system resource allocation.
- Improved software stability and performance through deep-level debugging of memory structures and program logic resulting in a significant reduction of system crashes.
- Validated technical system requirements by conducting iterative stress tests and performance profiling to ensure a seamless, low-latency user experience for the Level Up Showcase.

SKILLS

Systems & Infrastructure: Hardware Architecture & Assembly , IP Camera Surveillance Networks, Access Control Systems (Fob Entry) , Network Diagnostics
Programming & Logic: C++, Blueprint Visual Scripting, Data Structures, Behavior Tree Logic, Object-Oriented Analysis & Design
Core Strengths: Technical Troubleshooting & Root Cause Analysis, Systems Thinking, Performance Profiling, Rapid Prototyping, Davinci Resolve, Photoshop
